Fold along dotted line and place over the edge of the door

MARK AND DRILL 5/16" HOLES THROUGH DOOR. REAM OUT AND DEBURR CENTER HOLE.

1. With door in closed position, place template on inside of door at desired height so that short folded end is over the edge of the door.
2. Mark position of the three holes.
3. Using 5/16" drill, bore the three holes straight through the face of the door.

INSTALLATION INSTRUCTIONS FOR NO. 333N PUSH BUTTON LATCH

SPINDLE MUST BE FREE

1. Push the spindle and spring in thumb button end and insert the outside of door and inside of latch plate into the bolt of latch as far as possible. Securely screw lower end of spindle and fixture in place of latch with screws provided.
