

REVERSING SECURE ELEGANCE LOCK BODY

1. Remove 6 Philip Head Screws that hold lock body on.

Don't remove star shape screws

2. Remove lock body and flip 180 degrees.

Insert and slide upward till lock body stops.

--Drill pilot holes if needed
--Old holes may burr up. May have to flatten.

Reinstall the 6 screws

4. Remove strike from lock body

5. Turn strike 180 degrees and place back into lockbody

3. To reverse latch, remove screw inside door through rectangular hole in door frame.

6. Replace screw to complete reversal process. Finish install per hardware instructions

NOTE: Key Cylinder should be below door handle
